

# Smart Parking Navigation That Actually Works

Parking should be an **easy, stress-free experience** for every driver and parking manager.

Finding parking shouldn't be a guessing game. With **eExactnav™** drivers get real-time stall availability, real-time pricing, turn-by-turn navigation directly to open spots and the ability to pay—all from the app.

Part of eleven-x's award-winning **eExactpark™** smart parking solution, **eExactnav** eliminates the stress, wasted time and congestion that comes with hunting and paying for parking.

## How It Works Powered by Real-Time Data

### Find a Space

See availability by space type:

- Regular (Paid)
- Regular (Free)
- Accessible (ADA)
- Electric Vehicle (EV)
- Quick Stop
- Reservations - Multiple Types
- Motorcycle
- Loading Zones

### Navigate to Your Space/Zone or Destination

Easy-to-use navigation options:

- Spot — navigate to a specific stall of your choice
- Zone — navigate to a zone or area to see available nearby parking spaces
- Destination — select your destination to see nearby parking spots

### Payment

Parking details for the space or zone are automatically loaded so payment is simple... just click the button and you're on your way; no tickets, lines or inputting space details into the app. In-app payment is available where supported.

**Pricing:** See pricing for individual stalls or zones in real-time

**History:** Easily access and navigate to previous parking spots, destinations or zones

**Favorites:** Maintain a list of favorite spots or zones for quick, easy access

### Notifications

- Occupancy — Receive a notification
- Availability — Select a space in advance and receive a notification when it becomes available

# Seamlessly Integrates With **eXactpark™** For a Better Parking Experience

As part of the award-winning **eXactpark** smart parking solution, **eXactnav™** provides accurate, real-time 24/7 stall status and provides navigation for drivers directly to available spots. **eXactnav** features a range of benefits that truly make it the smartest choice on the market:

## Accessibility Support

- Text-to-speech input
- High-contrast text and background options, plus adjustable font sizes, can be set in the app or through the device's OS to meet minimum W3C accessibility standards.

## Safety Focused Design

- Minimal interaction with app required while driving; if your target spot or zone becomes occupied, **eXactnav** will automatically select a suitable alternative

## Personalized Settings

- Metric/imperial units
- Selecting parking availability radius
- Parking spot type filter and fullness threshold

## Multiple Languages

- Supports English, French (Canadian) and Spanish

More Than Just a Parking App...  
A Better Experience

## Technical Specs

### Platform Compatibility

- iOS versions 15 and 16
- Android versions 10, 11, 12 and 13
