

DYNAMIC, FRICTIONLESS PARKING

Beings with Stall-Based Occupancy Monitoring

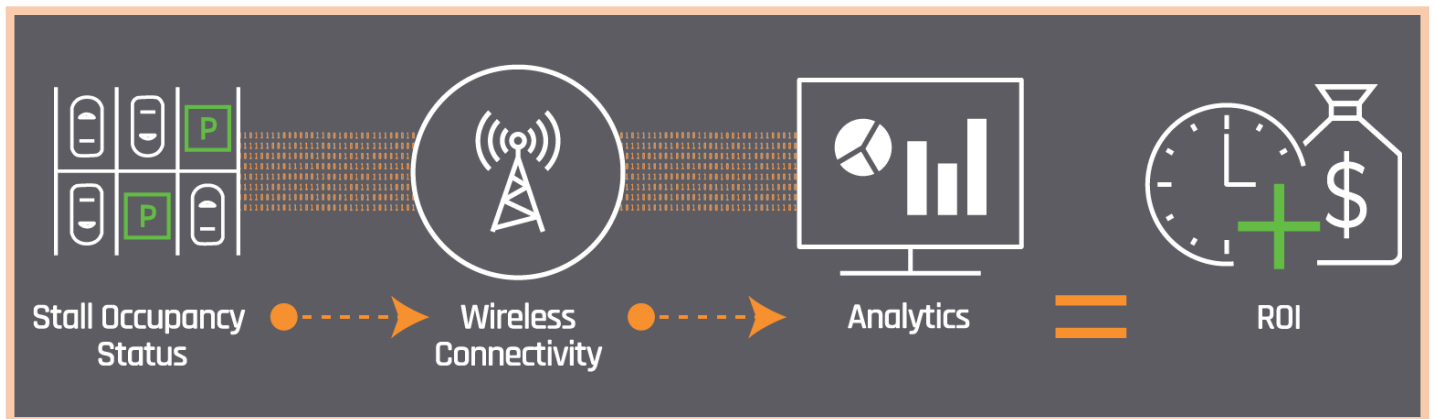

INCREASE REVENUE AND IMPROVE THE PARKING EXPERIENCE

USING CURRENT PARKING ASSETS

Cities and private organizations are constantly searching for ways to improve the overall parking experience while balancing aspects including compliance revenues, traffic congestion, the environment and public safety to name a few. The parking ecosystem, from curbside to on-street and off-street parking environments to enforcement and more, requires data to improve the decision-making when it comes to planning and programs. The eleven-x Stall-Based Occupancy Monitoring solution provides accurate real-time and historical data capture from parking assets in a cost-effective, long lasting (more than 10 years) and easy manner.

The eleven-x Stall-Based Monitoring Solution Offers:

- Accurate stall-based tracking
- Real-time status updating
- Parking profile development
- Easy integration with wayfinding, signage & more
- Automated analytics
- Usage data capture
- Dynamic pricing based on data
- Improved compliance revenues

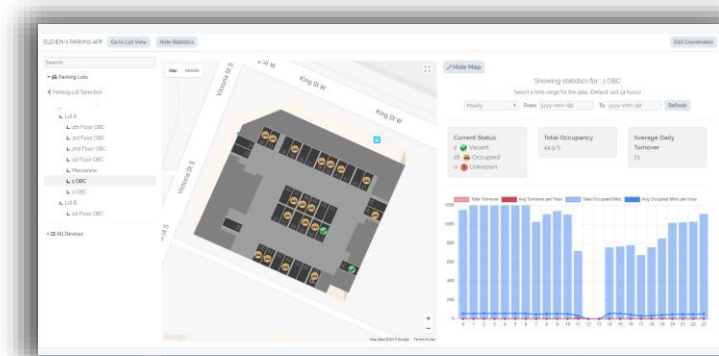

GENERATE MORE VALUE FROM YOUR EXISTING PARKING ASSETS

WITH THE eleven-x STALL MONITORING SOLUTION

eleven-x's wireless Stall Monitoring Solution enables real-time status updates to help drivers find available spaces quickly and easily reducing congestion and improving the parking experience. The data data is also captured, and can be used to build out a comprehensive parking profile to support dynamic pricing programs to help with making decisions on existing or future parking stalls and facilities. The solution can be deployed for any type of parking stall monitoring including onstreet as well as parkades.

The eleven-x Intelligent Parking Solution is easy-to-use and includes;

- Accurate parking sensors: indoor/outdoor use
- Near-zero maintenance
- Easy integration with other solution technologies
- Secure, wireless connectivity
- Data visualization and collection
- Long lasting - more than 10 years
