

Cost-Effective, Wireless Energy Monitoring

ENERGY WASTE - IT COSTS!

- Buildings in North America waste 30%-40% of their purchased energy
- Buildings account for 40% of CO2 emissions
- Average energy cost for commercial buildings is \$1,500/10,000 sqft/month
- Energy cost annualized is \$2.50/sqft

OUR SOLUTION

The Building360 Platform monitoring solution solves the current problems of Cost | Complexity | Compliance:

Cost:

- Extremely cost-effective packages available
- Typically realize savings 5%-10% range largely through no cost/low cost operational changes
- Significant additional savings can be gained on larger-scale programs

Complexity

- Easy to deploy, use and onboard additional team members
- Do more than identify areas of concern, get actionable recommendations to solve problems
- Easily scalable - to multiple buildings or adding other applications

Compliance

- Reporting features help managers stay within guidelines
- Supporting provincial regulation compliance - e.g. Ontario Regulation 507/18

OUR SOLUTION:

“To manage it, you must measure it”

The Building360 platform is a complete wireless, real-time energy performance monitoring solution that provides built-in analytics capabilities to identify energy saving opportunities

Building360 Insights

- Quickly gain a portfolio-wide perspective of energy-use
- Based on automated collection of monthly billing data per building

Building360 Real-Time

- Real-time monitoring of electrical, gas and water
- Monthly data reports pinpoints potential areas of concern and opportunity

Virtual Energy Manager

- Connects an expert energy analyst to a client's portfolio data each month
- Provides additional insight and advice in a detailed custom report

Getting started with a wireless Building360 monitoring solution is easy.
